Introduction

This document lists the currently supported EI&O Internet Servers. Users should use these values when configuring their Internet clients (e-mail, news, time, etc.) to work at EI&O and the University of Florida.

Domain Name Servers

The primary domain name servers for domain .UFL.EDU (including EI&O and the University of Florida) are:
128.227.30.254 (ns.name.ufl.edu)
128.227.30.252 (nse.name.ufl.edu)

Please see document D0118 "Domain Name Services for UFL.EDU" [http://docweb.cns.ufl.edu/docs/d0118/d0118.html] for detailed information on domain name services for all of domain .UFL.EDU including EI&O.

Directory (LDAP) Servers

The University of Florida directory is available online through an "LDAP" ("Lightweight Directory Access Protocol") server located at ldap.ufl.edu.

The appropriate search base is:

dc=ufl,dc=edu

[Eudora Users: In Word-wise Search Filter enter: (cn=*^0*) ]

You may use the directory to look up UF students, faculty, or staff, by connecting to

http://directory.ufl.edu  [http://directory.ufl.edu/]

Time Servers: Network Time Protocol

Domain .UFL.EDU has several Network Time Protocol servers which appropriate client software may use as a time-reference.

- ntpsl-1.server.ufl.edu
- ntps2-2.server.ufl.edu
- ntps2-3.server.ufl.edu
- ns.housing.ufl.edu (for UF Housing/DHNet)

For more information on Network Time Protocol, or to download NTP client software, see the
E-mail

Note
For information about UF Exchange e-mail, please refer to the UF Exchange web-site [http://mail.ufl.edu/].

EI&O maintains IMAP servers for remote mail access clients such as Outlook Express, Netscape Messenger, Pine, Eudora, Thunderbird, and Mail. In addition to serving EI&O-specific usernames, EI&O provides, manages and maintains e-mail servers for the GatorLink system.

Your E-mail Address

All GatorLink usernames should use

username@ufl.edu

as their e-mail address.

E-Mail Servers (SMTP)

Remote mail access clients require you to specify your mail server addresses.

<table>
<thead>
<tr>
<th>Account type</th>
<th>SMTP Server*</th>
<th>IMAP Server</th>
</tr>
</thead>
<tbody>
<tr>
<td>GatorLink</td>
<td>smtp.ufl.edu</td>
<td>imap.ufl.edu</td>
</tr>
</tbody>
</table>

*We recommend configuring your client to use the SMTP "Message Submission Port" (port 587) and TLS encryption to ensure your outgoing mail is not blocked by your Internet Service Provider's network policies. For detailed information, please see EI&O FAQ item Q1404, "I Can Read My UF E-Mail at Home, But Can't Send (Sending e-mail via UF servers when your ISP filters SMTP [port 25])" [http://docweb.cns.ufl.edu/qa/q1404/].

For more information on GatorLink accounts, see the GatorLink home page (http://gatorlink.ufl.edu/) [http://gatorlink.ufl.edu/].

Kerberos Servers

EI&O operates Kerberos authentication servers as part of the University of Florida "GatorLink" system.

• kerberos.ufl.edu (== kerberos1.ufl.edu)
• kerberos2.ufl.edu
Your Comments are Welcome

We welcome your comments and suggestions on this and all EI&O documentation. Please send your comments to:
