NERDC Welcomes New Employees ................................................................. 3
Milestones ................................................................................................... 3
Lin Baugher is new to Network Services, but he's a familiar face at NERDC. He began work here as a student assistant on the Support Desk in 1998. He left NERDC in 1999 and completed his Master of Science degree with a major in Electrical and Computer Engineering here at UF. Following graduation, he began work at Sprint PCS in Kansas City, KS. Now he has returned as an engineer for Network Services. "I had several other job offers, but this one was the best fit overall," says Baugher. "[In addition] I have a younger brother here at UF, and I'm familiar with the area." Baugher will be working with Network Coordinator Dan Miller on a variety of projects.

Paul Campbell recently became a part of the Open Systems group as a student assistant. Campbell, who is from Interlachen, FL, is working on his degree in Computer and Information Science and Engineering. Following graduation, he plans to pursue a graduate degree in computer science. In the meantime, he enjoys working at NERDC. "It's an open environment," he said. "They give you a problem and a set of tools, and let you solve it in your own way, with a peer review system in place to guide you." Campbell is currently working on an application that will allow general analysis of the logs of different servers.

NERDC is proud to welcome these talented new employees!
A number of NERDC employees celebrated milestone years with UF in 2000.

- Jerry Smith, computer operations supervisor: 35 years
- Keith Monroe, senior systems programmer: 15 years
- Dana Dahlstrom, telecommunications specialist: 5 years
- Ian Moffat, systems programmer manager: 5 years
- Ryan Vaughn, senior engineer: 5 years
