NERDC Versatec Plotter to be Replaced with HP 5000 PS Printer ...............................3
NERDC Versatec Plotter to be Replaced with HP 5000 PS Printer

Vibrant 4-color printouts as wide as 42 inches will soon be available for NERDC customers. NERDC recently replaced the aging Versatec plotter with a new large-format color printer, the Hewlett Packard DesignJet 5000 PS.

Over time, the Versatec plotter has become obsolete and of decreasing use to our computing community, so NERDC removed it from service.

The new machine is a 42-inch, PostScript level 3, color printer. It will be easier to use than the previous plotter and will have higher resolution, better color matching, and more flexibility in plot sizes. For more information about the new printer, including instructions on how to download the printer drivers to your PC, please contact the NERDC Support Desk at (352) 392-2061 or e-mail consult@lists.ufl.edu [mailto:consult@lists.ufl.edu].

Please watch for a NERDC News item to tell you when the new printer will be available for your use.

Check out what this printer can do! Color photos of sample output from the HP DesignJet 5000 PS are available at http://www.cns.ufl.edu/info-services/hpoutput.
