The Computer Challenge: An Overview of the UFCN Track .................................3
The Computer Challenge: An Overview of the UFCN Track

Last month we gave an overview of the IT Provider Track; this time we're focusing on the UFCN Track. The University of Florida Communications Network Track is a custom-designed track that's based on input from the UF Office of the Vice President for Public Relations. The UFCN track is designed to help UF's professional communicators use computer resources and the World Wide Web more effectively.

The units offering the courses are the Center for Instructional Technology and Training (CITT [http://www.citt.ufl.edu/]), University Personnel Services (UPS [http://www.it-train.ufl.edu/Provider.asp?ID=18]), Center for Instructional and Research Computing Activities (CIRCA), NETg [http://netg.ufl.edu/index.html] (administered by NERDC), and the Health Science Center (HSC [http://www.health.ufl.edu/itcenter/training/]). For more information on any of these providers, including registration information for any of these courses, go to http://www.it-train.ufl.edu/provider.asp.

To view this information online, go to http://www.it-train.ufl.edu.
