Campus Telecommunications Now Part of OIT ..........................................................3
Campus Telecommunications Now Part of OIT

Dr. Chuck Frazier, Vice Provost for Information Technology, announced on February 19, 2002, that the Telecommunications Department previously reporting to the Physical Plant Division has now become part of the Office of Information Technology (OIT-Telecommunications). This transfer follows the strategic recommendations of the IT review committee and will better prepare the University to migrate to a single network for voice and data.

The mission of Telecommunications is unchanged. It is still focused on providing high-quality telecommunications support for students, faculty and staff in support of education and research.

OIT-Telecommunications will continue to act as a single point of contact for all communications service providers. This allows the University to enjoy economic advantages and superior quality in services and equipment. As part of the OIT team, Telecommunications will continue to seek these advantages and to provide a high level of customer service. For additional information on Telecommunications' services, please call (352) 392-1146 or visit the Web site at www.it.ufl.edu/telecom [http://www.it.ufl.edu/telecom].

Telecommunication services are still obtained by contacting the Work Management Center at (352) 392-1121.
