Virus Scanning of NERSP E-mail Starts .................................................................3
Virus Scanning of NERSP E-mail Starts

Each incoming message on the NERSP mail server is now being examined for viruses. The service is similar to the virus scanning we started on the smtp.ufl.edu server in January 2002.

We expect that most users will not notice any difference (except for an extra header in each message that their e-mail program may or may not ever show them).

Each message passing through nersp.cns.ufl.edu will be scanned by virus scanning software from Network Associates, Inc., (the company which sells Virus Scan).

This NERDC NEWS item discusses virus scanning that is already in place for smtp.ufl.edu.

If you have questions or problems, please contact the NERDC Support Desk at (352) 392-2061.

Your Comments are Welcome
