NERDC Dial-up Statistics

These charts and data on these pages show usage figures for the NERDC dial-up servers.

Total Sessions

This chart shows the number of local and long-distance sessions per month. Sessions begin when a customer logs onto any dial-up server. E-mail composed in a PC-based system and mailed through NERSP or to a NERDC address does not count as a session until that person logs on and checks his or her e-mail.

Total Minutes

This chart represents the total number of minutes (per month) that users dialed in during the last fiscal year.
Your Comments are Welcome
