CNS History Webpage Updated

The CNS history and historical photo pages have just been updated. In the '70s, staffers in CNS's Information Services began collecting photos and preserving the memories of CNS and its predecessors, the UF Statistical Laboratory and the UF Computing Center, and the Northeast Regional Data Center (NERDC).

The clothes, the hairstyles, and the machines themselves might look a bit dated in those old photos, but the pictures and stories recorded there trace some of UF's part in an amazing societal and economic transformation... the explosion of the Information Age.

From 1952, when the UF Statistical Laboratory opened with punch card equipment, to 2002, with CNS receiving equipment for the newest project at the university, the Enterprise Resource Project, CNS's history page shows how far CNS, and the computing industry, have come over the last half century.

You can follow along with this ongoing journey at http://www.cns.ufl.edu/info-services/history.
