Dial-up Server Statistics FY2002-2003

Dial-up Servers at CNS

The charts and data below show usage figures for the CNS dial-up servers.

Total Billed Sessions

This chart shows the number of local and long-distance sessions per month. Sessions begin when a customer logs onto any dial-up server. E-mail composed in a PC-based system and mailed through NERSP or to a NERDC address does not count as a session until that person logs on and checks his or her e-mail.

Total Billed Minutes

This chart represents the total number of billed minutes (per month) that users dialed in during the last fiscal year (July 1, 2002-June 30, 2003).
Your Comments are Welcome
