CNS Welcomes New Faces, Says Good-bye

Personnel changes are happening at CNS. We welcome David Essex into the Front Office as secretary and Alex Brennan into Network Services. We've also had to say goodbye to Lin Baugher of Network Services and Carol Wucker in Accounting.

Lin Baugher Takes Job in Virginia

CNS Network Engineer Lin Baugher moved to Virginia for a job at Science Applications International Corporation. He will work as a consulting engineer there. According to Baugher's supervisor Dan Miller, his duties gradually changed during the four years he worked for Network Services.

"He took real ownership over the UF wireless implementation project," Miller said. "We'll certainly miss his technical competence."

Alex Brennen Starts Position in Network Services

Alex Brennen started in late March as an Information Technology expert in Network Services. He will report to Marcus Morgan.
"I help manage, develop, and maintain the university's networking software. These systems include DNS, DHCP, NTP, Quality of Service, and Network Monitoring," Brennen said.

"I'm excited to be here because UF has become a center of excellence in computer networking as well as in open-source software development and deployment. UF staff and students are continually visible leading cutting edge Internet communities and guiding emerging technologies," he said.

**David Essex Joins Front Office**

David Essex has moved from his part-time job in Operations into a full-time position as receptionist in the Front Office. His duties include answering the telephone and greeting visitors and service personnel. He is the first one people see when they come here.

"I really enjoy this kind of interaction with people. I live for customer service and am looking forward to working with people both on the phone and face-to-face," Essex said.

He started in Operations in August 2002.
Carol Wucker Takes Job at UF Athletic Association

Carol Wucker, assistant director, left CNS to go work for the UF Athletic Association as the assistant controller. Wucker has been at NERDC/CNS for almost nine years.

"My favorite thing about working at CNS has been the people. They are all very smart and nice, which are both my favorite qualities in people."

"I'll only be two blocks away," Wucker said.
