Microsoft Security Updates

Microsoft issued a remarkable number of security updates in February. Eight out of 12 updates were given a “critical” severity rating. These were related to programs including MS Office XP, Internet Explorer 6, Media Player and MSN.

If you haven’t done so already, please take a moment to update your computer with current security patches. These can be found at http://windowsupdate.microsoft.com and at http://www.officeupdate.microsoft.com. In addition, the UF site regarding the Microsoft XP SP2 discussion was updated. Please visit http://infosec.ufl.edu/sp2_issues.shtml.

The UF IT security team thanks you for being aware and responsible. Don’t forget to visit us and pick up safe computing tips at http://infosec.ufl.edu/athome.

Your Comments are Welcome

We welcome your comments and suggestions on this and all UFIT documentation. Please send your comments to:
