Security Policy Workshop Held April 19

On April 19, 2005, the UF IT Security Team [http://infosec.ufl.edu/] presented a security policy workshop that outlined and explained the new security policies that apply to all UF departments. Kathy Bergsma, UF Information Security Manager, and Jordan Wiens, UF Network Security Engineer presented different aspects of the new policy.

“There was a lot of information to digest so I hope people will take the opportunity to review the slides and watch the video,” said Bergsma. “And we’re more than happy to answer any questions that IT workers have.”

All UF IT workers were encouraged to attend as these policies affect all departments. The number of attendees exceeded the amount originally expected thus demonstrating to the security team that workers were eager and prepared to learn the new policies. In addition, a survey given to attendees showed that 92 percent of respondents thought the workshop was valuable.

The new IT security policy can be found at http://www.it.ufl.edu/policies/security.
