Software Products to be Discontinued in the Z/OS System ........................................3
Software Products to be Discontinued in the Z/OS System

Due to lack of use, contracts for the following software products will not be renewed for the coming fiscal year (FY05/06.)

• BILOG
• Clustan
• EQS MVS/XA
• IMSL Fortran Libraries
• LOGIT
• SPSSX/LISREL

This means that as of July 1, 2005, these software programs will not be available on the CNS Z/OS system. Each of these programs has been unused by any CNS customer for at least one year. Most of them have been unused for multiple years. Because of this, we are unable to justify the renewal of expensive usage and maintenance contracts for these products which are no longer desired or used by our user community. As always, if you have any questions or concerns about our intention to discontinue these products, please contact us at the CNS Support Desk at 352/392-2061, or by e-mail at consult@lists.ufl.edu. We will be happy to hear from you.

Your Comments are Welcome

We welcome your comments and suggestions on this and all CNS documentation. Please send your comments to:
