Critical Servers Should Be Registered

To avoid disruption of service, all University of Florida server managers should register servers vital to the UF or unit mission. To register critical servers, server managers must provide a fixed IP address, 24/7 hour contact information, and an IT Continuance of Operation Plan (ITCOP) to the UF ISM. The UF ISM will review the request with ITAC-ISM before registering critical servers. To learn more about ITCOP, visit http://www.it.ufl.edu/policies/security/uf-it-sec-cop.html. The Critical IT Resources Standard can be found at http://www.it.ufl.edu/policies/security/uf-it-sec-incident-response.html#critical.
