Mission Statement ....................................................................................................3
**Mission Statement**

NERDC is the Northeast Regional Data Center. Located in the Bryant Space Sciences Research Building (SSRB) at the University of Florida, NERDC is one of five regional data centers that are nodes in the State University System (SUS) Computer Network. NERDC is also a node in FIRN, the Florida Information Resource Network. These networks link the Northeast Regional Data Center, the Northwest Regional Data Center in Tallahassee (NWRDC), the Central Florida Regional Data Center at the University of South Florida in Tampa (CFRDC), and the Southeast Regional Data Center at Florida International University in Miami (SERDAC), as well as the Florida State University Computer Center in Tallahassee (FSUCC).

NERDC is a service organization whose mission and scope in a higher education environment is summarized as follows:

- Provide a full-service computer and information services center shared across a broad spectrum of user groups, which precludes unnecessary duplication and realizes economies of scale
- Accommodate rapidly changing technologies
- Provide service that cannot be cost-justified for individual groups or applications

Our function is to provide full-service academic and administrative computing to the State University System, including the following agencies:

- University of Florida
- University of North Florida
- Florida Center for Library Automation
- Institute of Food and Agricultural Sciences
- J. Hillis Miller Health Science Center
- Shands Hospital at UF
- Board of Regents and other SUS universities
- Other Florida educational institutions and governmental agencies
